ILLIAS OLANREWAJU

Full-Stack Product Engineer | Software & AI Development

Lagos State, Nigeria | +234 9065 219 168 | olanrewajuillias@gmail.com
GitHub: github.com/programmerolashow | GitLab: gitlab.com/olanrewajuillias

PROFESSIONAL SUMMARY

Full-stack product engineer with hands-on experience building responsive, scalable, and user-focused applications across frontend, backend, APIs, databases, and AI-powered workflows. Experienced with React, Next.js, TypeScript/JavaScript, Node.js, Python, FastAPI, REST APIs, authentication, database integration, and third-party services. Currently contributing to fintech products and internal software systems at Qorelly and a confidential AI-powered web product at AidenAI Technologies LLP. Passionate about AI integration, SaaS, developer tools, open source, and solving real-world problems through software.

PROFESSIONAL EXPERIENCE

Software Engineer

Qorelly · Full-time · Remote, Nigeria | Aug 2026 – Present

Contributing to the development and improvement of fintech products and internal software systems within the Engineering Department.

- Develop and maintain software features using modern web technologies and engineering best practices.
- Collaborate with engineers and team members to design, implement, test, and improve application features.
- Contribute to frontend and backend development, API integration, database operations, and application workflows.
- Participate in debugging, code reviews, Git-based version control, testing, and continuous improvement of existing systems.
- Apply software engineering principles to build reliable, scalable, and maintainable solutions in a fintech environment.

Full Stack Development Intern

AidenAI Technologies LLP · Full-time · Remote | Jul 2026 – Present

Contributing to the development and continuous improvement of a confidential AI-powered web product within an Agile/Scrum engineering team.

- Develop responsive and accessible interfaces using React, Next.js, TypeScript/JavaScript, and Tailwind CSS.
- Implement application features, integrate REST APIs and third-party services, fix bugs, and improve existing functionality.
- Contribute to AI-powered workflows, authentication flows, data handling, and backend integrations.
- Translate UI/UX designs into functional interfaces and collaborate with developers, designers, and stakeholders.
- Use Git and GitLab for branching, code reviews, collaborative development, testing, and debugging while maintaining project confidentiality.

Full-stack Developer Intern / Team Lead

Neominds EduTech Ltd · Full-time · Remote, Nigeria | Apr 2026 – Jun 2026

Led and contributed to the design and development of scalable, user-focused web and mobile applications, coordinating implementation and technical problem-solving across the development team.

- Coordinated frontend and backend tasks and supported delivery of product features within requirements and timelines.
- Contributed to responsive UI development, backend services, API integration, databases, and third-party services.
- Participated in system architecture and technical decisions covering technologies, application structure, and implementation.
- Reviewed and debugged code, mentored teammates, resolved blockers, and improved collaboration through Git workflows, testing, and code reviews.

Web Developer

Freelance · Remote, Lagos | Sep 2025 – Apr 2026

- Built responsive, scalable, user-focused web applications across frontend and backend layers.
- Developed APIs, managed databases, integrated third-party services, and focused on performance and maintainable architecture.

Frontend Developer

Freelance · Remote, Lagos | Oct 2022 – Apr 2026

Built responsive web interfaces and personal and academic projects using HTML, CSS, JavaScript, React, and Next.js. Applied CSS Grid, Flexbox, animations, responsive design, and frontend architecture principles.

PROJECT HIGHLIGHTS

ZoomTrans — University Transit Payment Platform

Full-Stack Project | FastAPI, Python, SQLAlchemy, Alembic, MySQL, JWT

- Designed a transit-payment concept focused on improving campus transportation and fare collection, initially targeting routes between PS, the hostel area, and UITH at the University of Ilorin.
- Built the backend foundation with FastAPI, SQLAlchemy, Alembic migrations, and MySQL, with JWT-based authentication.
- Developed a driver QR-code workflow as part of the fare-validation concept and considered mobile-app connectivity and offline testing scenarios.
- Approached the project with a focus on practical deployment constraints, extensible architecture, and the potential to scale to additional routes and campuses.

GitHub: github.com/programmerolashow/ZoomTrans

BankSpace — Fintech Banking Platform

Full-Stack Developer | End-to-End Development

- Independently designed and developed a full-stack fintech application with digital savings, investments, fund transfers, transaction management, and financial tracking.
- Architected frontend, backend services, API integration, database design, authentication, and application workflows.
- Designed scalable REST APIs and implemented validation, error handling, and transaction workflows with attention to data integrity, security, and maintainability.

GitHub: github.com/programmerolashow/BankSpace

Student Konnect

Full-Stack Web Application

- Social platform featuring video feeds, messaging, recommendation functionality, and scalable backend architecture.

GitHub: github.com/programmerolashow/student-konnect-hub

E-MASSCOM — AI-Powered Email Client

AI Integration, REST APIs, Authentication

- AI-powered email application featuring intelligent categorization, AI-assisted drafting, summarization, authentication, REST APIs, and responsive UI.

GitHub: github.com/programmerolashow/E-MassCom-AI-Powered-Email-Client

Guardian Fraud Detector

Python, Streamlit

- Prototype for analyzing suspicious messages, identifying phishing patterns, and providing security alerts.

GitHub: github.com/programmerolashow/Fraud-Detector

User Authentication System

Node.js, Express.js, MongoDB

- Backend authentication system featuring Mongoose models, REST APIs, CRUD operations, secure configuration, and database integration.

GitHub: github.com/programmerolashow/User-Authentication

EDUCATION

B.Sc. Information Technology

University of Ilorin, Kwara State | Oct 2024 – Sep 2028

Building foundations in software engineering, information systems, programming, databases, networking, and technical problem-solving.

Senior Secondary Certificate (SSCE)

Livingstone College, Lagos State | Feb 2020 – Jul 2022

Served as Senior Prefect, demonstrating leadership, communication, responsibility, and coordination skills.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, React Native, Expo, Angular, Tailwind CSS

Backend: Python, FastAPI, Django, Node.js, Express.js, REST APIs, Authentication, API Integration

Databases: MySQL, PostgreSQL, NeonDB, MongoDB, Mongoose, SQL, SQLAlchemy

AI & Automation: AI Integration, Generative AI, Prompt Engineering, AI-Powered Applications, Third-Party AI Services

Tools & Practices: Git, GitHub, GitLab, Alembic, Version Control, API Testing, Agile/Scrum, Kanban, Responsive Design, Open Source

Soft Skills: Leadership, Communication, Problem Solving, Team Collaboration, Adaptability

OPEN SOURCE & TECH COMMUNITY

Actively engaged in developer communities, technical conferences, hackathons, GDG events, API-focused events, and collaborative software projects. Interested in open-source contribution, knowledge sharing, continuous learning, and building impactful digital products.

CERTIFICATIONS

- HTML Fundamentals — Sololearn
- Web Development Fundamentals — Sololearn
